

MEMORANDUM

May 17, 2026

To: All Auronex Members
Subject: Network Fair Play and Participation Standards

Thank you for helping grow the Auronex network.

As part of our continuous protocol stewardship, we have strengthened settlement-era fairness controls under various policy streams. These updates are designed to preserve equal opportunity across the network while protecting long-term member outcomes.

To keep the system resilient, Auronex does not publish operational anti-abuse mechanics in public memos. This is intentional and necessary to maintain network integrity.

Auronex is built for everyone. Members who participate transparently, follow platform rules, and contribute real activity will continue to be prioritized by the reward model.

Members who attempt to exploit coordinated or unfair behavior should expect reduced effectiveness over time, including lower reward outcomes as protocol safeguards apply.

We encourage every member and sponsor to focus on sustainable growth:

1. Build your network through authentic referrals and real participation.
2. Avoid shared or coordinated practices intended to bypass normal reward conditions.
3. Maintain clean on-chain behavior and long-term activity consistency.
4. Support your downline with accurate guidance and responsible conduct.

Our direction remains unchanged: fair participation is rewarded, and unfair behavior is disincentivized.

Thank you for supporting a stronger and more equitable Auronex ecosystem.
